TCE.MTIHICDC	CE bezel, TI with super hard coating middle, and TI with super hard coating back
TCE.TIHC	CE bezel, TIHC middle and TIHC back
TGPCE.MGP	Combined SGP and Ceramic bezel, SGP middle and SS back
TGPDP	Combined SGP and PDP bezel, SS middle and SS back
TGP.MGPHC	SGP bezel, SGP and HC middle and SS back
TGP.MSSGP	SGP bezel, combined SS and SGP middle and SS back
TGP.TIHCCE	SGP bezel, combined TI, HC, and CE middle (No case back as it's a one piece case model)
TGPTI.TI	Combined TI and SGP bezel, TI middle and TI back
THC	HC bezel, SS middle and SS back
THC.BTI	HC bezel, BTI (Bright Titanium) middle and BTI back
THC.MHCPCDP	HC bezel, combined HC and plastic middle with SS back
THC.MSSCE	HC bezel, combined SS and CE middle, and SS back
THC.TIHCCE	CE Outer Case, TI HC Inner Case
THGMCETIHC	HGC bezel, combined Ceramics, TI and HGC middle and combined Ceramics, TI and HGC back
TI	Titanium
TPDP	PDP bezel, SS middle and SS back
TSGP	Combined SS and SGP case and SS back
TSSCE	Combined SS and Ceramic bezel, SS middle and SS back
TSSGP	Combined SS and SGP bezel, SS middle and SS back
TSSGP.GP	SSGP bezel, SGP middle, and SGP back
TSSHC	Combined SS and HC bezel, SS middle and SS back
TSSHC.HICDC	SSHC bezel, SS with super hard coating, and SS with super hard coating back
TTIHC.MTIHICDC.TI	Ti & HC bezel, Ti & HC middle, Ti Back
TTIHC.TI	Combined TI and HC bezel, TI middle and TI back
WR	Water Resistant
XL	Lumibrite hands and hour markers

AUTOMATIC

Powered by the movement of the wearer or by winding the crown. Approximately 50 hours power reserve. Accuracy +15/-10 seconds a day average. Hour, minute, second hand. Calendar.

Case Size
48.2mm

The Marinemaster series has long been renowned for the security and precision that the professional diver requires. This Marinemaster Professional 1000m Diver's has a two-layer case construction that is now the trademark of Seiko's professional diver's watches. Thanks to the strength of the inner case structure, the specially designed L-shaped gasket and the screw-down glass fixing ring, the watch is effectively impermeable to helium and can be safely used for saturation diving to great depths. The use of ceramic for the outer shell enhances shock resistance and also prevents any unintentional rotation of the bezel. This creation incorporates a mechanical calibre specially adjusted for a diver's watch and it is made and assembled, as is the complete watch, by Seiko's leading craftsmen at the Shizuku-ishi Watch Studio. The hands and markers are coated with a new version of Seiko's Lumibrite, which glows for 60% longer than in the past. The strap is made of extra-strength silicone for greater durability.

SBDX014 \$7300

GPS SOLAR DUAL TIME

Powered by any light source. Power reserve 2 years with power reserve indicator. Connects to satellites to pinpoint your position and adjust timezone accordingly*. Perpetual Calendar adjusts until February 2100. World Time function. Daylight savings function. Dual Time Facility. Hour, minute, second, am/pm indicator. Power save mode.

Case Size
48.5mm

SSF001J \$6900

GPS SOLAR DUAL TIME, TCE.TIHCDCWR, (20BAR), XL, SAPPHIRE GLASS,
LIMITED EDITION 1,500 PIECES WORLDWIDE, SPECIAL BOX,
M0YT111H0, 8X53

Imagine yourself passing through the Roaring Forties, sailing alone in a 60 foot yacht in high seas near Cape Horn, with only your skill and equipment separating you from danger and possible disaster. This is the prospect faced by ocean yacht racers like Kojiro Shiraishi, who has helped Seiko to create the new Marinemaster GPS Solar sailing watch. Knowing the exact time and time zone at sea is vital so that communication with the team back home can be synchronized, even in the waters near the poles, where time zones change with far greater speed than at the Equator. This new watch marries Seiko's proven skill in building watches suitable for the most demanding environments with a new timing technology that ensures that, with one touch of a button, the watch adjusts to the exact local time anywhere on earth, on land or at sea, using just the power of light. Furthermore, the Dual-Time function allows an ocean sailor to know at a glance the time in his or her home port as well as local time.

The new Marinemaster GPS Solar is built for the harsh conditions that every ocean racer has to foresee. The case and bracelet are made of corrosion-resistant titanium, protected by a super-hard coating and a ceramic bezel. The watch is 200 metres water resistant, with a screw-down case back and crown. Excellent legibility in any weather, day or night, is ensured by the sapphire crystal coated inside and out to minimise glare and reflection, the wide, prow-shaped markers and Seiko's latest Lumibrite coating. Complete ease of use was the designer's next concern. The crown and buttons are easy to use, even when gloves are worn and the case and bracelet are shaped to avoid any edge catching a rope or line. This very special watch is offered in a limited edition of 1,500.

*Timezone data as of January 2014. Changes to timezones occurring after this date are not programmed and manual adjustment may be required.

SOLAR WORLD TIME CHRONOGRAPH

Powered by all light sources. 6 month power reserve with power reserve indicator. World Time – 25 Cities pre-programmed. Dual Time Facility. Stopwatch measures 24 hours in 1/5th of second increments with split time facility. 24-hour alarm. Hour, minute, second hand. Calendar.

Since the launch of our first diver's watch in 1965, Seiko has brought to professional divers a stream of innovative new technologies and designs that have made diving safer and easier for the professional and recreational diver alike. Thanks to these advances and to the supreme quality of our diver's watches, Seiko has earned a high reputation of trust in the diving community.

By a strange coincidence, a few months after Seiko's first diver's watch appeared two American dive enthusiasts decided that standards of training in diving needed to be raised and founded the Professional Association of Diving Instructors. Over the past fifty years, PADI™ has become the world's most trusted scuba diving training organization. With over 6,300 Dive Centres and more than 136,000 qualified PADI professional instructors around the world, PADI has issued an amazing 24 million certifications and has done more than any other organization to introduce diving to the world.

Seiko and PADI share a passion for ensuring the safety and enjoyment of divers and for protection of the marine environment, so a partnership felt very right.

To celebrate and promote this partnership we introduce the Prospex PADI Special Edition.

SOLAR ALARM CHRONOGRAPH, SSWR, (10BAR), XL, HARDLEX GLASS, ROTATING INNER RING, L0DG011J0, V172

In 1913, Seiko made its first mechanical watch. In 1956, Seiko made its first automatic watch. In 1958 Seiko created its shock resistant system, Diashock, to preserve precision when the movement is subject to impact. In 1959, Seiko invented the Magic Lever spring winding mechanism, and in 1964, it started producing balance springs in-house, utilizing its own specially developed alloy, Spron. In 1967, Seiko created Japan's first hi-beat calibre. In 1969, Seiko made the world's first automatic chronograph with vertical clutch and column wheel systems and in 2014 Seiko's mechanical watchmaking skills were rewarded with a prize at the Grand Prix d'Horlogerie de Genève for its hi-beat calibre.

For over a century, Seiko has developed and refined its mechanical watchmaking skills. Today, all this experience comes together in a new, all-mechanical, collection named Presage. Presage has already been successful in Japan and selected other markets for some time. Now Presage goes global and takes centre stage as Seiko's leading mechanical watch collection.

The new Presage collection draws its inspiration from Seiko's heritage in mechanical watchmaking, which stretches all the way back to 1913 and the celebrated Laurel which was Seiko's, and Japan's, first ever wrist watch. This heritage is brought to life today in the Presage Platinum Collection. The design echoes that of the 1913 Laurel and whose dial layout and markers are almost identical to the legendary 1913 creation.

Oscillating Weight

Movement of the wearer rotates the oscillating weight.

Rotor

Transforms every movement of the oscillating weight into a magnetic charge.

Rechargeable Long-Life Battery

Stores the generated electrical energy.

Generating Electricity

The natural movement of your body is sensitively transformed into electrical energy.

Storing Electricity

A high performance long-life **rechargeable** battery stores the energy to power the watch.

Utilising Electricity

Advanced electronic circuitry ensures that the energy is converted with optimum efficiency into a quartz signal.

Circuit Block

Controls voltage and amperage. And by quartz oscillation, it produces a precise watch signal.

SEIKO SOLAR

No Battery Change Required

SEIKO. Solar watch experts since 1977

SEIKO

CORPORATE GIFTS

DEDICATED TO PERFECTION

Specialised timepieces are the perfect corporate gift for service awards, incentive and reward programs, product launches, corporate gifts, safety awards, promotions and many other corporate occasions.

Customisations Options:

- Dial printing of company logo up to 5 colours
- Engraving logos and or text message on the case back or clasp

All watches are supplied in presentation boxes with full Seiko warranty

Minimum orders 1 unit

For more information contact Petersens Jewellers Merivale:

Email: petersens@clear.net.nz

SPORTS TIMING & SPECIALTY CLOCKS

The world over, people have come to rely on the expert time keeping of SEIKO. Whether this be a major sporting event like the IAAF Championships which SEIKO have timed since 1987, or a Landmark clock, such as the Waco Department store in Japan, SEIKO has a timing solution for any need.

The extensive range of Sports Timing Equipment, and Landmark Clocks are now available in Australia.

Both catalogues can be found on our website
<http://www.seiko.com.au/pr-media/sports-timing>
